eForms Express™ 3.0

Medical

How it Works – Front Desk

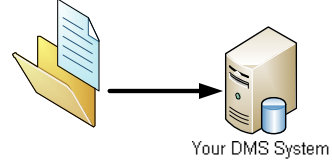

Reception prints all forms using *eForms Express™ 3.0*. (History, HIPAA Release, Diagnosis, Super-Bill, Encounter).

Patient fills in all required encounter forms and returns to front desk.

Front desk scans encounter forms (HIPAA release, insurance information) into public folder destination.

DMS polls the public folder and pulls in documents and file according to document type and unique bar code value.

How it Works - Doctor

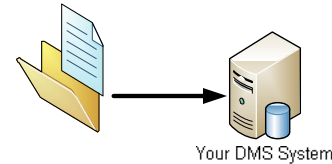

The remaining forms are placed into patient chart for the doctor to use. (Diagnosis, Super-Bill, Notes)

When visit is completed., the scheduling assistant receives all remaining forms.

The remaining documents are scanned into public folder destination.

DMS polls the public folder and pulls in documents and file according to document type and unique bar code value.
